QA Automation Engineer

SUMMARY

MCA graduate with a strong foundation in software testing, automation frameworks, and performance testing concepts. Experienced in developing test scripts, documenting test cases and defects, and applying SDLC/Agile methodologies through academic and internship projects. Quick learner with basic programming skills in Java/Python, eager to contribute to quality assurance processes in a fast paced environment.

SKILLS

Programming & Scripting: Python, Java, C#, SQL, JavaScript

QA & Automation Testing: Automation Testing, Test Case Design, Test Execution, Regression Testing, Selenium, API Testing

Performance Testing: Performance Testing, Load Testing, Stress Testing, JMeter, LoadRunner, Performance Analysis

Testing & Methodologies: SDLC, STLC, Agile, Scrum, Defect Life Cycle, Test Planning, Test Strategy

CI/CD & Version Control: CI/CD Pipelines, Git, GitHub, Continuous Testing, Build & Deployment Basics

Web & Application Technologies: HTML, CSS, REST APIs, Web Technologies, Client Server Architecture, Application Architecture

WORK EXPERIENCE

QA Automation Testing Intern

Cognifyz Technologies — Jun 2025 - Aug 2025

- Designed and executed functional, regression, and automated test cases for web applications based on business and technical requirements.
- Developed automated test scripts using Python and Selenium, improving test coverage and reducing repetitive manual testing effort.
- Performed REST API testing using Postman and validated HTTP status codes, request/response data, and API functionality.
- Conducted performance testing using JMeter, including load and stress testing, and analyzed response time, throughput, and error rate.
- Identified, documented, and tracked software defects, collaborating with developers to reproduce issues and verify fixes.
- Followed SDLC, STLC, Agile, and Scrum methodologies and used Git/GitHub for version control and test automation code management.

PROJECTS

WEB APPLICATION QA AUTOMATION FRAMEWORK

- Developed an automated testing framework for a web based application using Python, Selenium, and PyTest.
- Automated login, registration, search, form validation, and user workflow test scenarios.
- Created reusable test scripts and implemented assertions for functional and regression testing.
- Performed REST API testing using Postman and validated response status codes and data.
- Maintained test cases, execution results, and defect reports following SDLC/STLC and Agile practices.

JMETER PERFORMANCE TESTING OF REST APIS

- Designed performance test scenarios for REST APIs using Apache JMeter.
- Configured multiple virtual users to perform load and stress testing.
- Used Thread Groups, HTTP Request Samplers, Assertions, Timers, Controllers, and CSV Data Set Config.
- Measured response time, throughput, latency, and error percentage during test execution.
- Analyzed JMeter results to identify performance bottlenecks and application response issues.
- Generated performance reports and documented test observations and recommendations.

EDUCATION

MCA Master of Computer Applications — Visakhapatnam

Gayathri Vidya Parishad College Of Engineering (Autonomous) — Oct 2024 - Mar 2026

- CGPA:8.55

B.Sc-(Maths, Physics & Web Technology) — Kurnool

Silver Jbuilee Govt. College (Autonomous) — Jan 2021 - Dec 2024

- CGPA:8.04

CERTIFICATIONS

- Oracle Cloud Infrastructure 2025 Certified DevOps Professional - Oracle
- PCAP: Programming Essentials in Python — Cisco Networking Academy / OpenEDG Python Institute
- CCNA: Introduction to Networks - Cisco Networking Academy

ACHIEVEMENTS

- ITCR Computer Fundamentals, MS Office & Internet competition: 1st place at district level.
